Reflexology

The application of pressure to areas on the feet (or the hands). Reflexology is generally relaxing and may help alleviate stress. The theory behind reflexology is that areas of the foot correspond to organs and systems of the body. Pressure is applied to bring relaxation and healing to the corresponding area of the body. Several studies indicate that reflexology may reduce pain and psychological symptoms, such as stress and anxiety, and enhance relaxation and sleep. Excellent if you're seeking relaxation and stress relief.

25 mins	£43	55mins	£53
