LASER HAIR REMOVAL

LumiLASE technology outputs specific 808nm wavelengths for precision hair removal. Our hair removal devices offer fast, pain-free treatments tailored to our guests' unique requirements. Powered by advanced diode laser technology enhanced with cooling and safety features, LumiLASE hair removal devices put our guest's comfort, safety, and compliance first.
The LumiLASE device includes a diode laser, which is superior to the commonly used IPL technology which emits a broad spectrum of light and is less precise and effective. LumiLASE offers a permanent hair reduction and is a brilliant replacement for shaving and waxing.

A patch test and consultation must be completed prior to any Laser treatment and a course of 6 or 8 treatments is recommended to achieve optimum results.

Patch Test / Consultation	25 mins	£35 (redeemable on purchase)
